

## My Experience at Sehgal Neo Hospital

On 29th July 2016 when we entered the Sehgal Neo Hospital around 11 AM, the condition of my son was critical and doctor attended him within no time and suggested for admission. The room was not available although they started treatment at Casualty itself and after some time room was allotted and treatment began. Nursing and house keeping staff is very curious and available all the time. Today the 3rd Aug 2016 my son is getting discharged after being in continuous care healthy and fit. Overall my experience with nursing, house keeping and Doctors along with dietician has been excellent.
