

BEST HOSPITAL IN DELHI & NCR

1. SELECTION OF DOCTORS done by management is very very good, as all the doctors chosen for this organisation are too good, smiling, intelligent, co-operative which a patient needs more than medicines.
2. Nursing staff is also too good, co-operative & always smiling. The best medicine a patient get in a hospital. The skills of nursing staff is also good.
3. TPA doctor & staff is very helpful, this is also important in today's time as mostly ^{patients} come under private medical or corporate medical coverage
4. The facilities of xray, ultra sound that is provided in the room itself is unique in itself. This helps a suffering patient a lot.
